

# YESTERDAY'S TOMORROW

Step into the Ice Hotel room of Yesterday's Tomorrow and be transported on a visionary voyage into a world where the future is born from the past. In an era where the machine age was rising, a new design aesthetic emerged, one that fused industrial pragmatism with elegance. From cars to trains, buildings to home appliances, the Streamline Moderne style captured the essence of this movement, emphasizing smooth, curved lines and horizontal symmetry, all for an aerodynamic and minimalist appearance. Drawing inspiration from the iconic Art Deco style, it prioritized practicality, shedding excess and transforming into something sleek, sophisticated, and efficient. Get ready to marvel at a room that showcases the beauty of the past while paving the way for the future.
