

Design Submission for Icehotel 36

Title : « Soap bubbles »

Description :

The project immerses us in the world of children's games, an imaginary and oversized world.

It address the theme of carelessness and ephemeral.

On one wall, a child's face emerges and blows.

At the head of the bed, his hand holds a bubble stick.

Some saop bubbles settle down the bed.

On the opposit wall, a bubble projected by the breath is bursting and splashing.

The composition concentrate on essential details and use the space to describe a dynamic gesture.

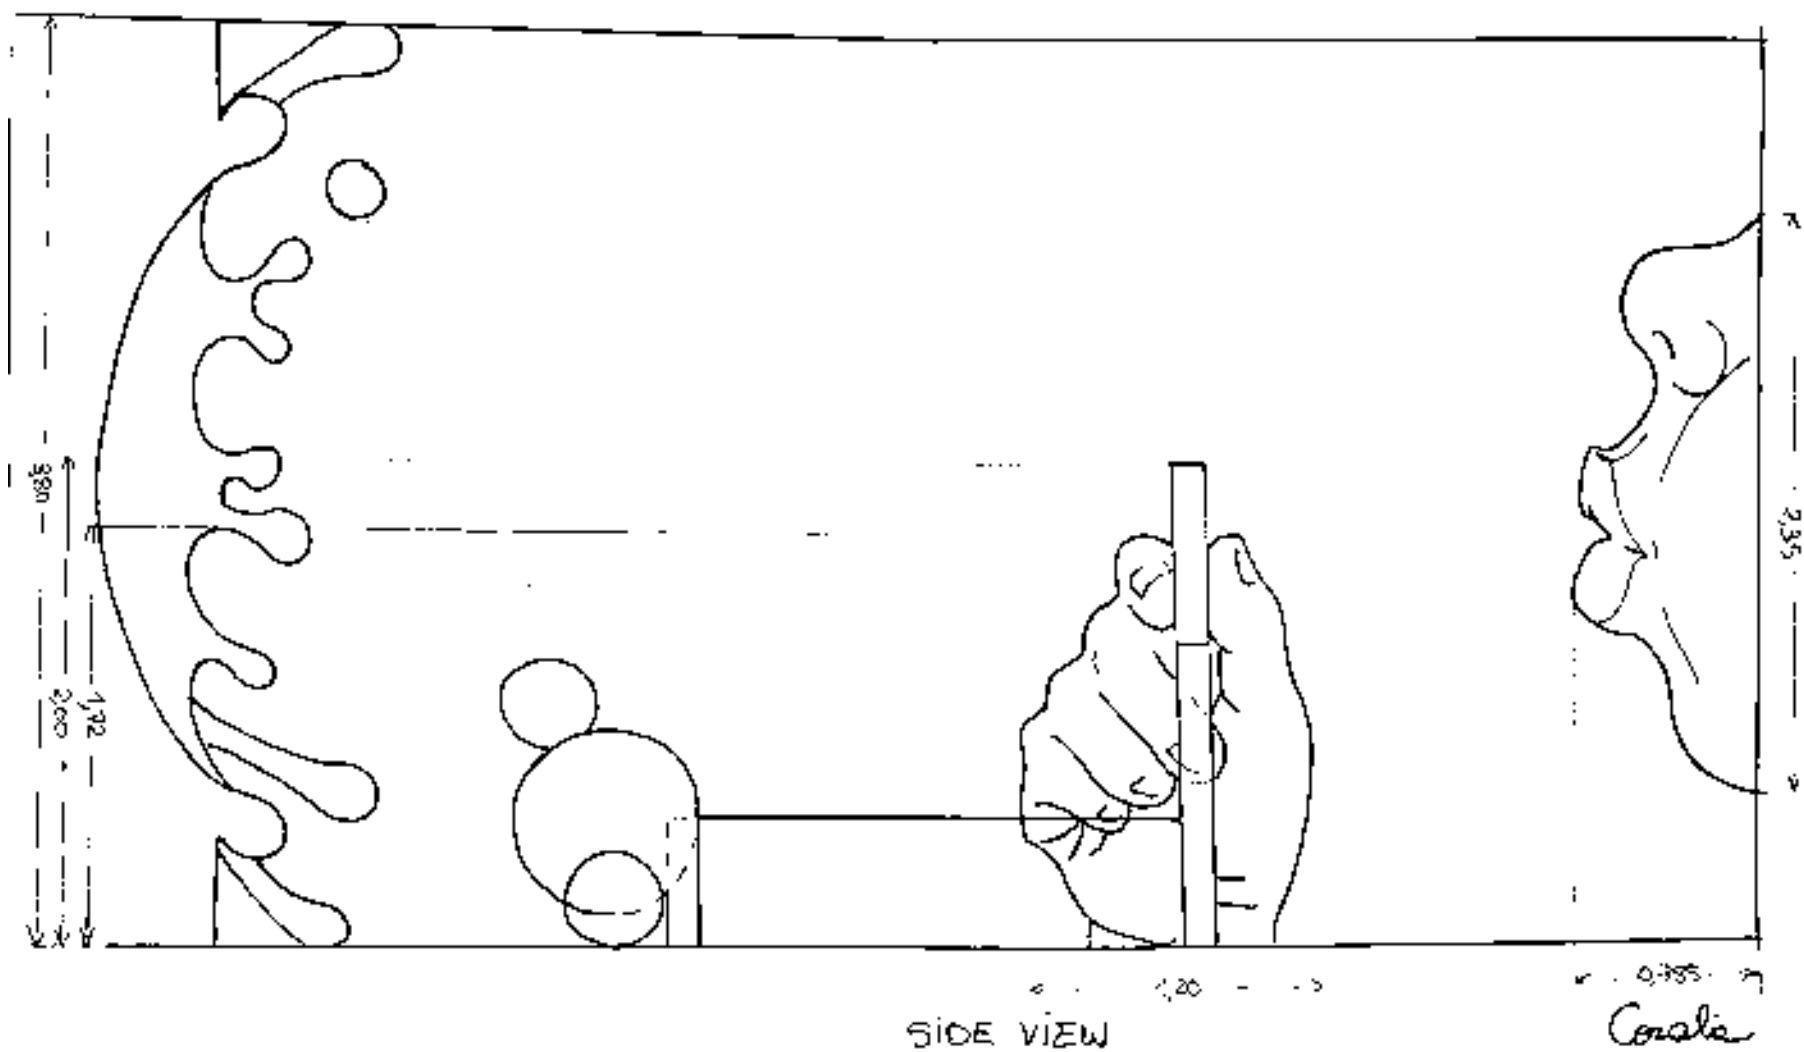

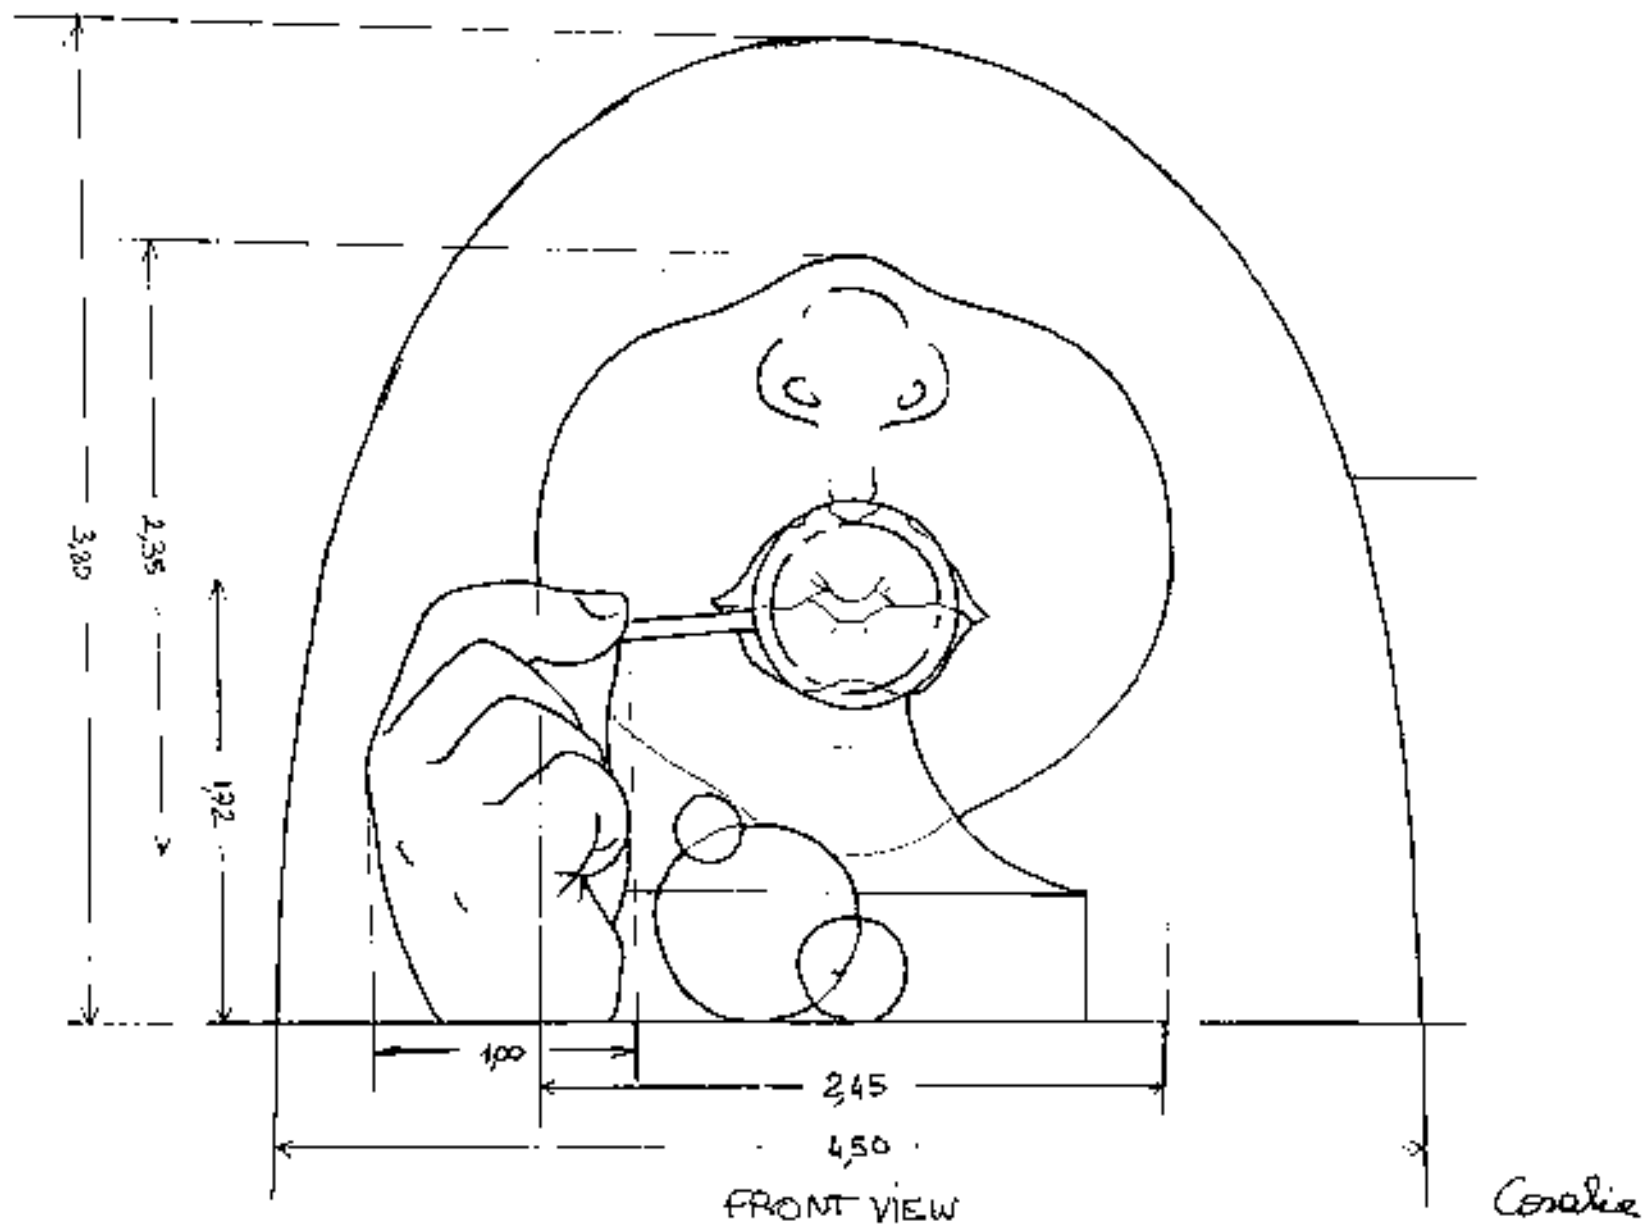

It invites us to appreciate beauty and fragility of life through the purity of a child's action.

The face, the hand and the bursted bubble are made of snow.

The stick and the bubbles are made of ice.
